

**For the grave  
candle industry**

# A grave candles tradition

Over the centuries, beliefs regarding souls have changed, but the need for remembrance of the loved ones who have passed away has not changed. One of the symbols of hope for a new life is fire lit on the graves of the dead – in the old days in the form of a bonfire, today a candle or a candlelight.

Filled or with cartridges, made of glass, plastic or ceramic, disposable or reusable. Today's market presents us with a wide range of candles, the sales of which reach the highest point during the All Saints' Day.

PRODUCT	MAIN APPLICATION	TECHNICAL SPECIFICATIONS

## 2 PRODUCTION METHODS

Raw materials for the production of filled, granulated and pressed grave candles

## WIDE PRODUCT RANGE

Possibility of adapting products to customer requirements

# Grave candles production goods

In order to address the needs of the producers of grave candles, Polwax S.A. offers a wide range of products that are the perfect raw material for the production of grave candles and mouldings. Thanks to the use of suitable adsorbents in the refining process and specific additives, the products offered are characterised by very good colour and stability of parameters.

These products can be broken down by their production method: raw materials for filled grave candles or produced by the method of granulation and pressing. Some of the paraffin from this group will also work very well in the production of tealight candles.

### **Product suitability guarantee**

The guarantee of suitability of individual products applies only to physical and chemical parameters and is counted from the date of sale. Detailed parameters are specified in the technical conditions available at [polwax.pl](http://polwax.pl)

### **Storage method**

The products should be stored in closed packages, protected against direct sunlight, moisture and mechanical impurities, away from heat sources. In addition, the technical conditions include information on the appropriate storage temperature, as well as the possible shelf life of individual products stored in accordance with the guidelines.

### **Conditions of delivery**

The products are manufactured in the Production Plant in Jasło (PL38200) and Czechowice-Dziedzice (PL43502). Possible collection by own transport on the basis of the FCA production plant. It is possible to organize transport by Polwax S.A. (based on CPT), after presenting a price offer including delivery costs to the customer's premises.

### **Orders and delivery schedules**

Orders for full truck loads should be sent at least 7 days before the planned shipment of the product. In the case of larger quantities for regular collections, it is advisable to send a monthly collection schedule by the 20th day of the month preceding the month of delivery.
