

HAVENO · CANDLES & GRAVE CANDLES

A brief history

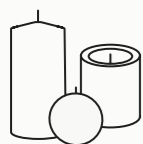

Over the years, the process of candle and grave candles manufacture has evolved. From cottage industry work, through traditional techniques used by small factories, to industrial production using modern technological production lines. As the method of production changed, so did the raw material, the type of wick, the appearance or the intended use of the product.

More than 15 years ago, our company joined the ranks of candle and grave candles manufacturers. Since then, we have been perfecting and developing our manufacturing methods and, thanks to access to our own laboratory, we are constantly improving the quality of our products.

Our Grave Candle and Candle Production Plant has facilities for producing both hydraulic press candles (cylinders, balls or napkin lanterns), mechanically poured grave candles and candles, as well as free-standing handmade gallery candles.

However, our possibilities do not end there! If you don't find what you are looking for, contact us and we will help you to create your dream product according to your design.

Machine-made candles

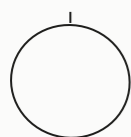

Produced in large batches using modern equipment. We can produce candles in various shapes and sizes, in varied colours and with different aromas.

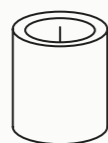

Cylinders

Ø 40–100 mm,
h 40–300 mm

Balls

Ø 60, 80, 100 mm

Lanterns

Ø 80 h 90 mm
Ø 100 h 120 mm

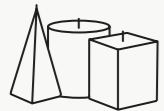

Outstanding versatility

The ability to make any shape and colour means that machine-made candles can be used as a decorative element at home, in a spa, in the office or in the garden. They are also used during important celebrations, emphasising the unique atmosphere of the place and the occasion.

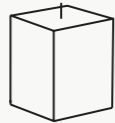

A napkin lantern, thanks to the service of designing wrappers according to the customer's custom order, can become a unique interior decoration element, a gift or even a holiday souvenir. Festive, floral, abstract patterns, presenting fauna or flora. This and much more can be found depicted on our lanterns.

Rustic candles

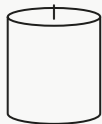

The advantage of handmade production is not only the variety of sizes, shapes or colours. It is above all the lower production minimums compared to mass production and the uniqueness of each candle.

Cuboids

40x40, h 60-200 mm,
65x65, h 60-200 mm,
75x75, h 60-200 mm

Cylinders

Ø 40-80 mm,
h 40-200 mm

Pyramids

65x65, h 240 mm,
80x80, h 300 mm

Unique textures

Unique candles that add a timeless decorative element that fits both traditional and modern interiors. They are ideal for the living room, the bathroom or a spa room.

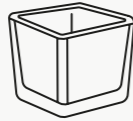

Popular rustic candles can be placed literally anywhere. They imitate naturalness, hence the lack of smooth walls and of a uniform colour. Their characteristic and deliberate unevenness of texture and discolouration give each candle its own unique pattern.

Poured candles

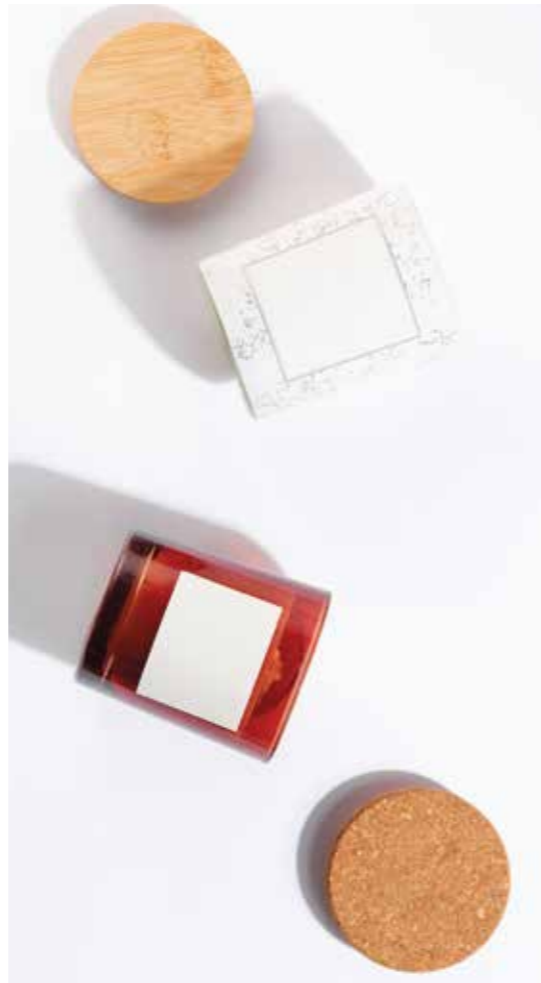

The candles are produced using a modern pouring line, allowing production to take place on a mass scale. Containers, lids, fragrances, weights, colours, wick types and labels are all designed according to specific customer requirements.

Glass containers

size, colour, weight, aroma as required

Metal containers

size, colour, weight, aroma as required

Ceramic containers

size, colour, weight, aroma as required

Modern design

Poured candles are a modern and subtle element of home or office decoration. In addition to standard glass containers, poured candles are also available in ceramic or concrete containers, in a jar or in earthenware.

Candles of this type are ideally suited to the current Zero Waste & Eco trend. After the candle has burned out, the minimalist and modern container can be given a 'second life', e.g. as a vase, pen cup or container for another candle.

Garden candles

Poured candles in containers designed to be used outdoors. A container with a thick base, high walls and a suitably sized wick allows you to safely enjoy the allure of an outdoor candle.

Metal containers

size, colour, weight, aroma as required

Ceramic containers

size, colour, weight, aroma as required

Glass containers

size, colour, weight, aroma as required

The alternative to lamps and more...

Garden candles in metal, stoneware as well as glass containers are an invaluable and charming element conducive to outdoor relaxation. The warm yellow light of the candles is perfect as additional or substitute lighting for the balcony, terrace or garden.

These beautiful decorations also have a practical function. They can easily ward off annoying insects, mainly mosquitoes. This is all thanks to a carefully selected composition of essential oils containing, for example, citronella, lavender, cloves or cinnamon. A decorative anti-mosquito candle prevents painful bites, making time spent in your own garden even more pleasant.

Fireplace candles

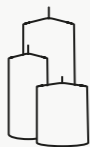

Candles available in two variants: a set of machine-made cylinders with a smooth surface in large batches and a set of handmade gallery candles with an interesting wood imitation structure.

Gallery candles

Ø 90 h 200 mm, Ø 75 h 150 mm,
Ø 65 h 90 mm, Ø 100 h 100 mm
weight of the set is about 2,5 kg
burning time: 50 - 105 h

Machine-made candles

Ø 100 h 200 mm, Ø 100 h 250 mm,
Ø 100 h 300 mm
weight of the set is about 5 kg
burning time: 110 - 170 h

A magical atmosphere for everyone

The glow of a crackling fireplace is not only a source of light and warmth. It creates a unique atmosphere associated with the warmth of a home, which is particularly appreciated in the evening with the lights out.

Our collection of fireplace candles has been designed for all those who want that special atmosphere, but do not have a traditional fireplace, live in blocks of flats or in areas that have been subject to anti-smog legislation. A set of 4 candles with a wood-like structure allows you to enjoy the extraordinary atmosphere for hours.

Candles for Easter

A specially selected collection that creates a unique, festive atmosphere. The variety of shapes, colours and fragrances allows our candles to fit any interior.

Machine cylinders

Screen-printed candles in spring colours and motifs

3D candles

Gallery, Easter-themed handmade candles

Poured containers

Fragrance compositions in decorated containers

Festive atmosphere

Colourful candles with springtime floral aromas are an element which complements the Easter decorations. Placed on the table, they add a special touch to every moment of celebrating together. In addition to candles based on Easter traditions (Easter eggs, lambs, chicks or bunnies), we also offer candles that are poured. These candles accentuate the tableware wonderfully, cast a warm light and their spring fragrance floats pleasantly in the room.

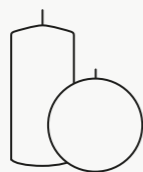

Machine-made candles dipped in spring colours or decorated with festive motifs using screen printing complete the Easter collection. They look great alone on a table or as part of an Easter centrepiece.

Candles for Christmas

From machine-made candles, to candles poured into containers, to candles handmade in our workshop. The Christmas collection is all about beautiful colours, attractive shapes and unique aromas that are sure to add a festive touch to your interior.

Machine cylinders

Decorated, scented candles produced using structural waxes. Colours to be agreed with the customer

3D candles

Hand poured in silicone moulds, festive motifs and decorations

Poured candles

Containers in various textures and shapes: ceramic, glass. Aroma additions that bring to mind the Christmas spirit

Special candles for special holidays

Christmas is a magical and special time, accompanied for centuries by the glow of candles. Enriched with the aroma of Christmas baked goods, oranges, cinnamon or cloves, they create an extraordinary atmosphere in our homes. They make every cold evening pleasant and homey.

Candles from our Christmas collection are also suitable as gifts for loved ones. In addition to typical Christmas designs: richly decorated with varnish, glitter, in the shape of a Christmas tree, Christmas bauble or a star, our portfolio also includes products for modern interior design lovers: candles covered with pastel structural varnish, simple forms or candles poured into simple containers.

Refillable grave candles and grave candles with paraffin wax inserts

A wide range of poured grave candles and grave candles with paraffin wax inserts in various shapes, with different decorations and handmade details.

Glass containers

size, colour, weight, type as required

Plastic containers

size, colour, weight, type as required

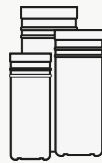

Quality and aesthetics

A wide selection of shapes, sizes, colours and hand-made details is the basis for creating a custom-made grave candle. Combining tradition with modern trends, we make every effort to ensure that our products guarantee not only exceptional aesthetics, but also quality. Every day, our Control Department conducts numerous checks and tests verifying the quality of raw materials and the product itself at various stages of the manufacturing process.

Proven suppliers, ongoing laboratory tests and qualified personnel are the elements that allow us to create an offer tailored to the individual needs of our customers.

Paraffin wax inserts

An extensive product line which varies in height and diameter of the tubes and the grammage of the paraffin moulding. Standard shapes make it possible to match the inserts to all the grave candles available on the market.

Haveno

Sample weights:
50-100 g 110-120 mm
150-160 g 130-140 mm
200-300 g 180-250 mm
400-450 g 200-290 mm

Private Label

Production of paraffin inserts for private brands - comprehensive service of designing and manufacturing inserts according to the Client's guidelines

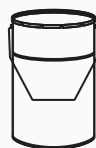

Top quality all year round

The height and diameter of the tube, grammage and burning time, the label and packaging are all elements that we select to create a finished product according to the customers' specific wishes. The paraffin inserts we offer are made from the best quality materials, which allows them to increase their resistance to various atmospheric conditions. In addition, thanks to special manufacturing processes, they are characterised by long burning times and even burning till the very end.

We also offer private label HAVENO inserts which are a combination of quality and aesthetics. A meticulously compiled paraffin mix enclosed in a robust tube with a suitably selected wick guarantees a long burning time. The whole is complemented by a minimalist label in beige, stylishly presented in glass candles.

Anti-frost torches

A paraffin product made according to customer wishes. This allows for an individual approach when selecting the grammage and burning time. In addition to the finished products in metal tins, we also offer additional inserts. This is a simple and environmentally friendly way to reuse the durable packaging.

Torch in a metal box

capacity: 6L
dimension: 272/180 mm
net weight: 4,8 kg
burning time: 10-12 h

Torch insert

dimension: 263/165 mm
net weight: 4,2 kg
burning time: 9-10 h

1 product, 2 methods

Anti-frost torches work by combining two methods: heating with smoke. The smoke creates a protective layer that reduces heat loss similarly to the way a greenhouse works. In turn, the heat of the torch warms the air and soil in its immediate surroundings.

This product allows us to protect even large areas easily and quickly. It is very flexible in application, it can be spread out as required and according to the wind direction, and thanks to the cardboard wick, setting it alight is quick and efficient.
